Lead Python Developer

(07/03/2018)

You will join the development team of one of our new product. This program involves the automated analysis of the security implementation of software-based solutions, such as mobile applications.

This position is particularly dedicated to passionate senior software engineers, keen to join an innovative program in the demanding area of connected solutions security. You will join a dynamic and expertise-driven environment, with agile development.

Your day-to-day at eshard for this position

You are keen to develop your expertise in the software security area. You explore new reverse engineering techniques, tools and communities.

You take the architectural lead of a new exciting feature, and you will involve the technical and commercial management to make sure that your new design and roadmap fits the internal vision and the customer needs. During efficient meetings with the team, you quickly grasp how it should be implemented and who could do it. Then you create a detailed issue that you add to a future milestone and you will be able to follow-up the good delivery of the feature. You are the owner of this task.

You mainly work from our office in Martillac, France in between vineyards and forest; it is important to have a nice place to work and socialise with colleagues. Parts of your job may require to interact with customers all over the world. Our office culture is highly technical, our organisation fairly flat and our mindset flexible, friendly and fun.

This position is open to any education degrees. eshard provides an attractive remuneration package including an incentive plan and a good health Insurance.
